London W6 9EW

Guide Price: £950,000*

TERRACED HOUSE IN NEED OF UPDATING WITH DEVELOPMENT POTENTIAL

The property is a centre terraced Victorian style dwelling that benefits from gas central heating and double glazing. We understand that the property at one stage was arranged as two self contained flats although the current owners reverted it to a single dwelling a number of years ago. It may have scope to reconvert back into flats, subject to obtaining any necessary planning consent that may be required. The property is within a residents parking scheme and also offers scope for a possible loft extension, again subject to obtaining any necessary consent that may be required. The house is in need of updating and modernization throughout. The property is located just to the south of Hammersmith Broadway with its excellent shopping facilities and underground station. Charing Cross Hospital is opposite and the A4 providing access to London, Heathrow Airport, the M4 and M25 motorways is also nearby. There are numerous bus connections and the area is a very popular district. This house is sold with full vacant possession.
